Canyon carving

Inspiration : The Grand Canyon

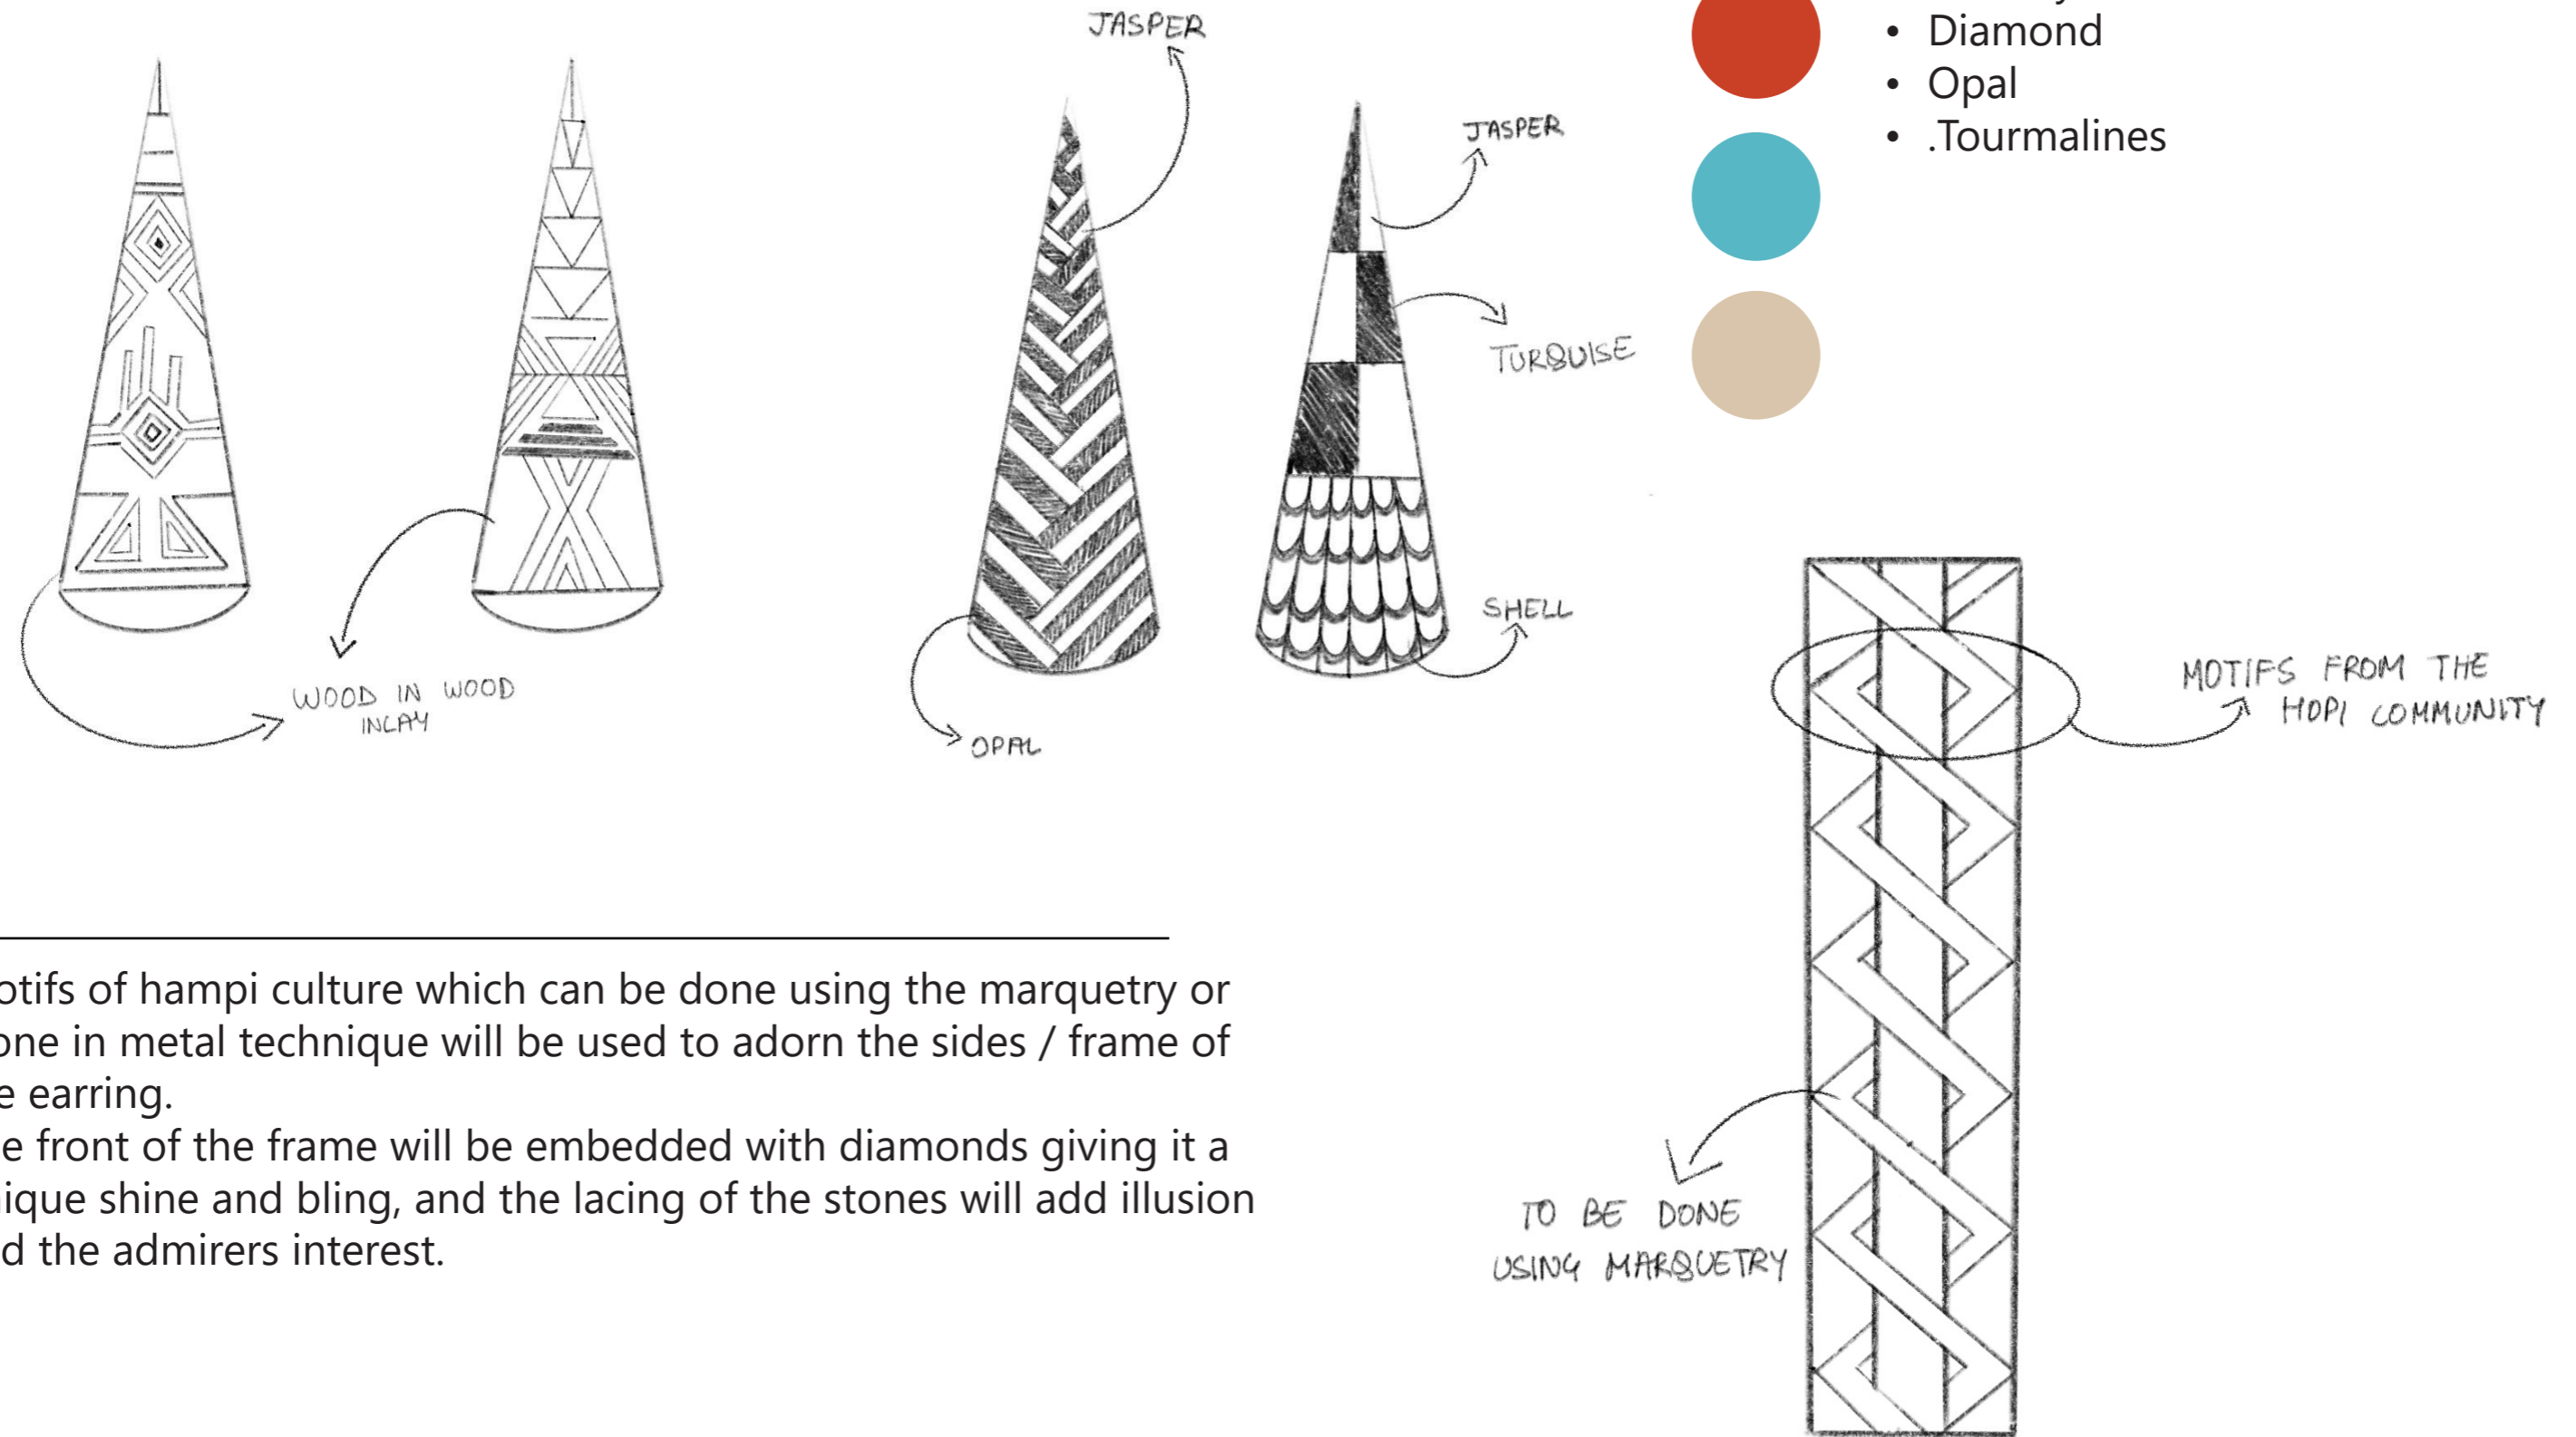

The brief is to design a adornment piece which narrates a story, gives a sense of place, is bold and fearless and fits under the topics of **WILD WONDERS AND ILLUSUIONARY BALANCE**. It is fit for working women of age 22- 35 who like to express themselves, try out different ways of styling and create statement in their day to day life such as functions, meetings etc.

Form Derivation from the grand canyon

Creating side views for the earring

Inspired by the grand canyon the culture also serves a great inspiration and touch to the design of the earrings. Making the side/frame design using the materials and motifs relevant to the culture gives the earrings both aesthetic and material diversity.

The stones and colours used in the piece were derived from the cultures of hampi.

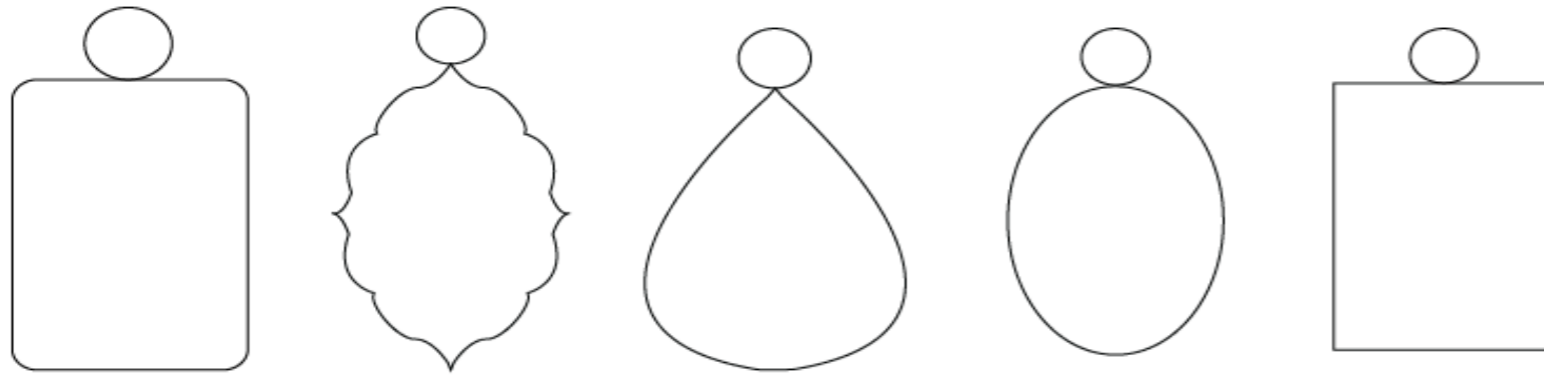

the stones that can be used are:

- Amethyst
- Diamond
- Opal
- .Tourmalines

Motifs of hampi culture which can be done using the marquetry or stone in metal technique will be used to adorn the sides / frame of the earring.

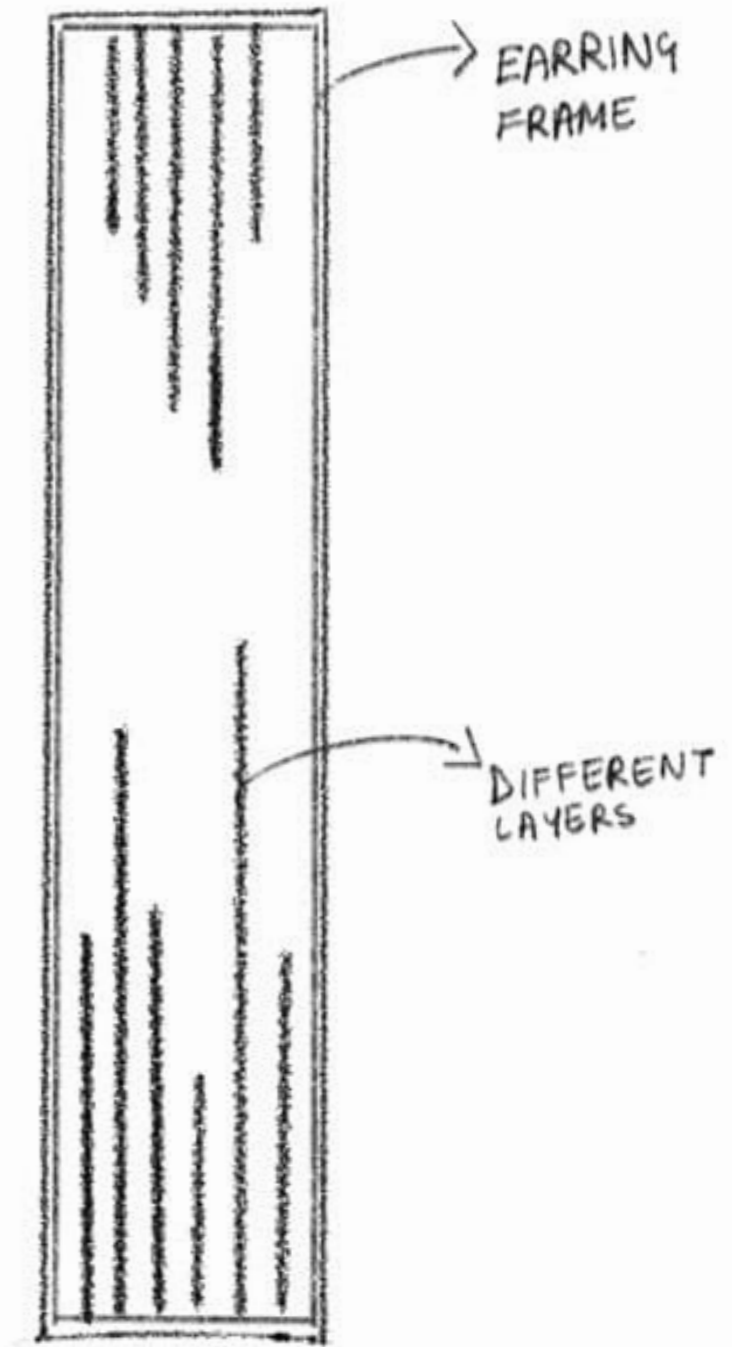

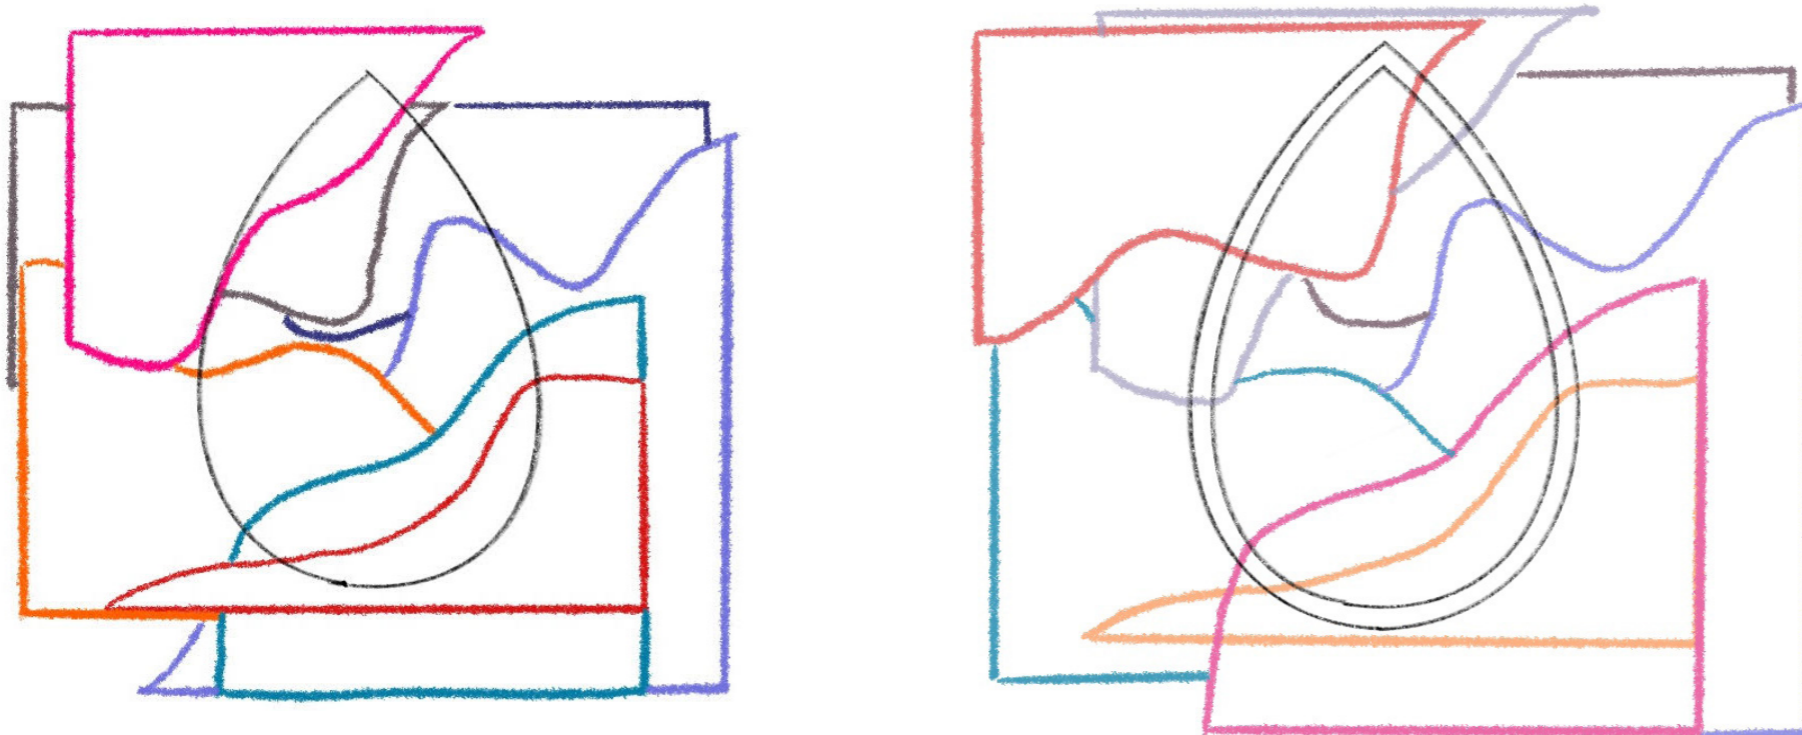

The front of the frame will be embedded with diamonds giving it a unique shine and bling, and the lacing of the stones will add illusion and the admirers interest.

The idea of creating the grand canyon look is to layer thin pieces of Metal laced with stonesb in the frame to create a **PLAY OF SHADOW** and layers giving the earring an interesting and realistic look.

Understanding the different shapes of the earring drops which will go with the theme and will serve the desired market.

Experimentiing with shapes and putting the layer in different orders too figure out which composition fits the best with the theme and the aesthetic look of the earring.

The layers placed inside the frame will look something like this. Creating dimensions and a shadow play.

This 3D modelling of the earring on rhino showcases how the layers will work and how it will look.

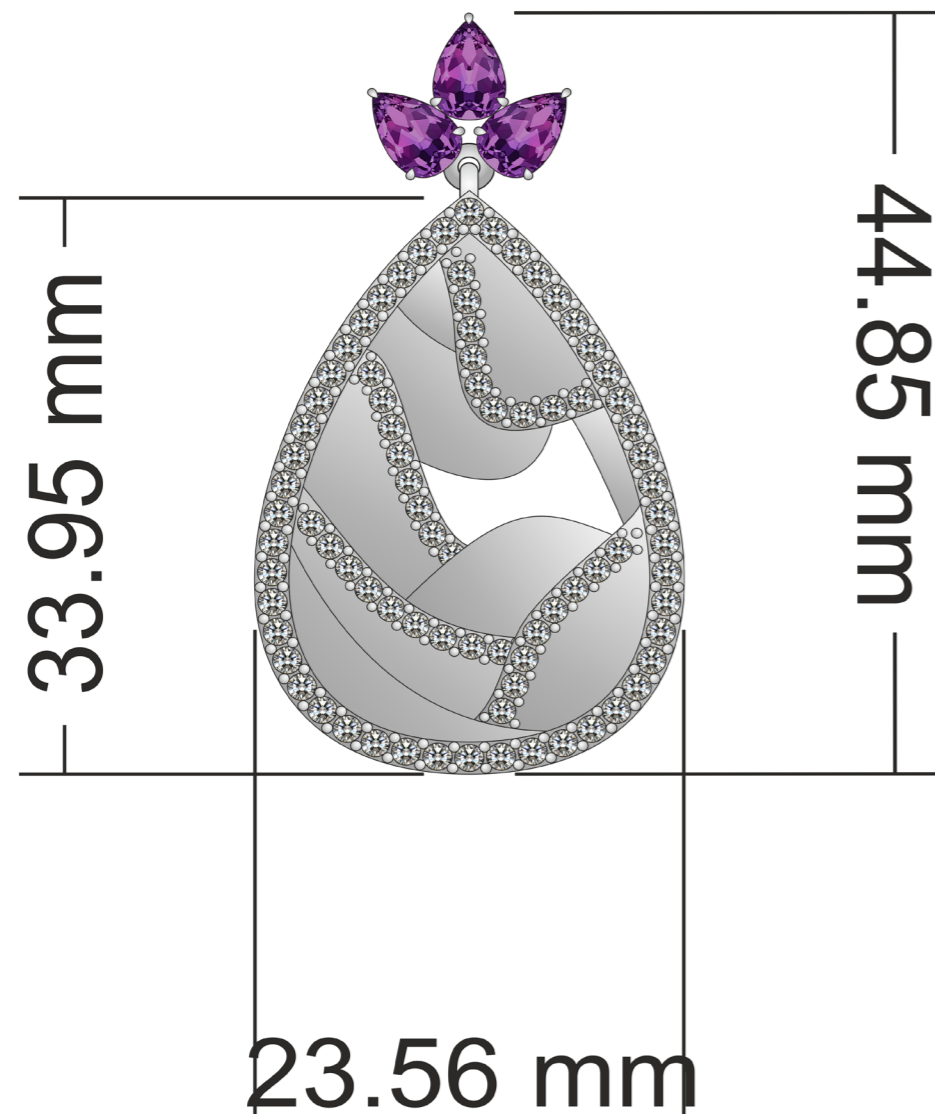

THE FINAL

The final piece showcases the dance of light and shadow both amongst the metal layers and amongst the stones.

The outer frame is adorned with round diamonds, while the inner layers showcase a delicate lacing pattern of smaller diamonds. The earrings also feature a 6x4mm pear-shaped amethyst gemstone, adding a touch of color and elegance.

Measurements

6x4mm PR Amethyst

1.60mm RD Diamond-Outer frame

1.50mm RD Diamond-Inner layer lacing

2.00mm RD Diamond-Side view

Inner metal layer thickness-1mm

Distance between each layer-0.5mm

7.00 mm

Side view
